Product Line: Fortinet

Introduction

Fortinet is the confirmed leader of the Unified Threat Management market. Fortinet's award winning FortiGate™ Series of ASIC-accelerated antivirus firewalls, winner of the 2003 Networking Industry Awards Firewall Product of the Year and the 2004 Security Product of the Year Award from Network Computing Magazine, are the new generation of real-time network protection systems.

Fortinet Antivirus Firewalls detect and eliminate the most damaging, content-based threats from E-mail, Web and file transfer traffic such as viruses, worms, intrusions, inappropriate Web Content and more in real time – without degrading network performance. FortiGate systems are the only security products that are quadruple-certified by the ICSA (antivirus, firewall, IPSec, NIDS), and deliver a full range of network-level and application-level services in integrated, easily managed platforms.

Fortinet has authorized eight authorized reseller partners to provide PEPPM pricing. Authorized Fortinet Resellers are listed in alphabetical order. Please contact Chris Cleary if you would like assistance with resellers specializations or expertise.
