8000-0156	RICH MEDIA STUDIO PRESENTATION APPL	VBrick Rich Media Studio – The VBrick Rich Media Studio combines multiple video/audio inputs with any xGA/DVI source to provide an advanced presentation offering. Users can plug in cameras, DVD player, and other video/audio sources into the video/audio source. They can combine this with their computer, document camera, etc. into the xGA/DVI source. The appliance combines these into one video stream that can be viewed in VBrick's VEMS system. Additionally, the combined stream can be reflected by VBrick's reflector technology allowing organizations to use their bandwidth efficiently by sending one stream over low bandwidth links and reflecting it on the far end to multiple end users. The one stream can also be sent to VBrick's VBoss service for Internet delivery	\$ 16,795.80	EA	Vbrick Systems	8000-0156
