

What's New for PEPPM in 2009?

PEPPM is the single most cost-effective source for all your technology needs

PEPPM has 306 product line and 21 Catalog contracts available for the PEPPM 2009 bid year

PEPPM has bid and awarded 35 new product lines for 2009 in addition to the PEPPM 2008 product line awards that continue to be in effect. That means that you have more brands available to purchase your technology products using the PEPPM Program. Contracts are valid from January 1, 2009 through December 31, 2009.

All of the top brand computers, networking and telecommunications equipment, printers, copiers and related peripherals have been awarded to over 190 different vendors. Brands like HP, Dell, Xerox, Apple, Promethean, LightSPEED and Cisco have contracts awarded to the manufacturer or one of their resellers.

Be sure to check our web site, www.peppm.org, to find out which vendors hold the contracts.

The state has filed a Form 470 for the new PEPPM contracts for E-rate year 12 on behalf of all schools and libraries in Pennsylvania.

In addition to the new product line awards, PEPPM has expanded the number of catalog bid contracts offering buyers an array of more than 1,000 bid protected technology related brands in the areas of:

- Educational Software
- Networking & Telecommunications
- Audio Visual Equipment
- General Hardware & Software
- Refurbished Computers & Parts
- End of Life Computer Systems & Parts

With all PEPPM contracts buyers enjoy complete bid protection backed by PEPPM's Terms and Conditions. You avoid the time and expense of bidding yourself and our awarded vendors promise to give you the lowest prices they will offer in Pennsylvania.

Schools and agencies that use PEPPM contracts also enjoy the value-added services provided only through PEPPM, such as contract price verifications, purchase order archiving, vendor contract compliance verification, vendor interventions and quarterly reporting.

With PEPPM you can maximize your technology budget and minimize your administrative time
