Komplement is a state local and education consultancy. Our organization works with manufacturers of technology to help find technology solutions to help solve the government entities needs for innovative technology solutions.

The Aura Wireless Apogee antenna solution is a Software-defined antenna for wireless networks.

Apogee™ is a system comprised of an antenna featuring an embedded, whisper quiet micro-controller and the Apogee Manager™ Cloud. Through proprietary firmware the micro-controller enables the autonomous operation of the rich feature set of the antenna and communication with the Apogee Manager™ Cloud for remote configuration and management. Superior RF signal propagation combined with remote addressability dramatically improves network performance and economics by significantly reducing infrastructure and labor costs by a ratio of up to 7:1. The platform continues to deliver economic benefits by reducing technician dispatches to re-optimize in response to changes unique to each wireless venue.
