

## Vendor Contacts and Ordering Instructions

To assure PEPPM bid protection, all PEPPM orders must be emailed to [orders@peppm.org](mailto:orders@peppm.org) or faxed to PEPPM at **800-636-3779**. In the body of the purchase order, please include the following language: "As per PEPPM".

**Product Line:** Delivery network services, DDoS mitigation, internet security, and distributed domain name server services

### Introduction

Cloudflare is on a mission to help build a better Internet. Cloudflare operates one of the world's largest, most-peered networks on earth with multiple connections to all cloud providers. With 300+ data centers globally, every data center is capable of powering all Cloudflare services. Cloudflare's global network provides security, performance, reliability and privacy to customers in a fully cloud-based environment without adding any hardware, installing software, or changing a line of code.

Cloudflare's services fall into four major categories:

1. **Application Services** - Capabilities required to deliver applications to the internet: e.g. WAF, Load Balancing, DDoS, Bot Management, DNS, CDN, Rate Limiting, etc.
2. **Zero Trust Services** - Capabilities required to protect end users as they work on the internet. E.g. Secure Web Gateway, Zero Trust Remote Access, Remote Browser Isolation, DNS Filtering, etc.
3. **Network and Connectivity** - Capabilities required to securely connect physical sites and networks to the internet. E.g. Network Layer DDoS protections, Network Transit, Site Connectivity, Firewall.
4. **Serverless Computing** - Capabilities required to build and run applications that run on globally distributed infrastructure. E.g. Serverless Compute, Data Storage, Developer Tooling.
